Professional Summary

Results-oriented Full Stack Developer with hands-on experience in Java, Python, and the MERN stack (MongoDB, Express.js, React.js, Node.js). Proven internship experience at STL Digital and Netsol IT Solutions in building secure web solutions, RESTful APIs, and AI-integrated platforms. Passionate about scalable system design, real-time data processing, and delivering user-centric software products.

Education

MIT World Peace University

B.Tech in Computer Engineering

Pune, India

2022 – Present

Technical Skills

Languages: Java, Python, C/C++, JavaScript, HTML, CSS

Frameworks & Libraries: React.js, Redux, Node.js, Express.js, jQuery, Tailwind CSS, OpenCV

Databases: MySQL, MongoDB

Tools & Concepts: Git, REST API, AI & Machine Learning, Computer Vision, System Design, UX Design

Projects

Celebrity Face Recognition System | *Python, OpenCV, Deep Learning, face_recognition*

- Built a real-time face detection and recognition system capable of identifying 50+ celebrity faces with ~94% accuracy using OpenCV and deep learning-based facial embeddings.
- Implemented live webcam integration with bounding box overlay and name annotation for recognized subjects.
- Optimized encoding pipeline to reduce average recognition latency by 30% through batch preprocessing.

Aurevia – AI Medical Research Copilot | *MERN Stack, AI Integrations* | [Live Demo](#)

- Built an AI-powered MERN medical research platform supporting clinical query analysis, treatment risk evaluation, and evidence-based ranking across 10,000+ PubMed entries.
- Integrated PubMed, OpenAlex, and ClinicalTrials.gov APIs with a modular Node.js/Express backend pipeline.
- Developed responsive React dashboards featuring authentication, session memory, and what-if scenario analysis.

NexaWell – AI Digital Health Platform | *MERN Stack, AI, Tailwind CSS*

- Developed a full-featured healthcare platform with role-based dashboards, appointment scheduling, medical records management, and real-time chat for 3 user roles.
- Integrated AI-powered symptom checker, food detection, and a health assistant chatbot, improving self-diagnosis accuracy by 40%.

Full Stack Company Website | *MERN Stack, REST APIs*

- Developed a production-grade company website with admin panel, product catalog, and customer inquiry management system using React.js and MongoDB.
- Implemented secure JWT-based authentication and scalable product workflows, reducing admin overhead by 25%.

Experience

Intersect Creative

July 2025 – December 2025

Web Developer Intern

- Built and optimized backend services for an Appointment Booking System using Node.js, Express.js, and MySQL, handling 500+ concurrent booking records.
- Designed relational database schemas improving query performance by 35%; developed responsive UI with JavaScript and jQuery.
- Implemented input validation and security hardening, reducing reported vulnerabilities to zero during QA testing.

STL Digital Limited

Feb 2025 – June 2025

IT Intern

- Collaborated with the Technology Services team to support real-time IT projects, performing system analysis to optimize delivery workflows.
- Reported project status and technical findings directly to leadership, maintaining alignment with strategic objectives.

Netsol IT Solutions Pvt. Ltd.

June 2024 – Jan 2025

Web Developer Intern

- Architected RESTful APIs with Node.js and Express for an Appointment Booking System; optimized MySQL schema for 40% faster data retrieval.
- Developed dynamic, responsive UI with real-time feedback using JavaScript and jQuery; enforced security measures across admin and client modules.

Certifications

Walmart USA Advanced Software Engineering Virtual Experience | **Forage**

[View Certificate](#)

- Built a custom heap data structure in Java; designed UML diagrams and ERDs for scalable data processing systems.

Deloitte Australia Technology Job Simulation | **Forage**

[View Certificate](#)

- Completed software development simulation; proposed design and architecture for an interactive business dashboard.

Skyscanner Front-End Software Engineering Virtual Experience | **Forage**

[View Certificate](#)

- Built a travel date selection UI using Skyscanner's Backpack React library; executed automated testing for frontend validation.

Interests

Focus Areas: Full Stack Development, AI & Machine Learning, Computer Vision, Scalable System Design, UI/UX Innovation
